

**EATON****Aeroquip****Premier Plus
Distributor**

Your hydraulic & industrial hose experts.

Providing solutions for
greater equipment
uptime and exact factory
replacements in minutes.
We guarantee it!

OUR COMPANY

Providing quality products for over 35 years,
our customer base extends across Ontario,
Canada and the United States.

OUR PRODUCTS

- Eaton hose brands, including Aeroquip, Everflex and Synflex
- Other leading brands, including Nycoil, Goodyear, Stauff and OmegaFlex

100 Mountain Rd., Collingwood, ON 705-445-7222

SERVICES

ON-SITE INSTALLATION

Our skilled technicians design, fabricate and install hose and tube assemblies for optimum system performance. Whether emergency service, retrofitting existing equipment or new design application is required, our experienced personnel will save you time and money by delivering quality products and technical knowledge to your doorstep.

INVENTORY MANAGEMENT

The Omniflex VMI (Vendor Managed Inventory) program reduces customer costs associated with maintaining hose, hose fittings, adapters and hose assembly inventories. Eliminate man hours in receiving product, replenishing stock and forecasting usage.

PREVENTATIVE MAINTENANCE

Omniflex offers a comprehensive preventative maintenance program. A thorough survey and audit of all systems summarizes the replacement value of each product along with any recommendations to improve routing, safety or performance.

OEM HOSE ASSEMBLIES

Omniflex caters to the demanding Original Equipment Manufacturers (OEM) market. We are Eaton-Certified Fluid Conveyance Experts (E-CERT™). We offer quick access to Eaton's products coupled with our design and assembly expertise, competitive value and just-in-time delivery of custom hose assemblies in bulk or kit format. Our capability covers ¼" to 2 ½" hose assemblies, from low to super high pressures (6000 PSI), from low temperature (-70° F) to high temperature (+400° F) tube stocks, and from North American to metric thread ends on our hose fittings and adapters. Every assembly is cleaned, capped and labeled for identification. **Kitting/Sub-Kitting** further enhances the order process by identifying in one container the exact product required to plumb a unit or sub-assembly.

HOSE CENTER

Product Lines

Aeroquip

A complete line of hydraulic hoses from 1/4" to 3", with pressures as high as 10,000 psi. Eaton Aeroquip is a leader when it comes to: operating pressures, abrasion resistance covers and maximum operating temperatures. The MatchMate Hydraulic Hose line outperforms all other manufacturers specifications.

A variety of hydraulic adapters in standard and non-standard configurations to meet everyday needs. Available in steel, brass and stainless steel. Numerous end configurations are available in:

- JIC
- SAE O-ring BOSS
- ERMETO tube fitting
- NPT
- METRIC adapters
- SAE split flange
- ORS
- BSPP / BSPT
- Braze and weld
- STC

A range of coupling products encompassing simple (air couplings), complex (hydraulic applications) and most complex (self contained breathing apparatus – SCBA). All couplings are designed to meet or exceed a variety of SAE and ISO specifications. Available in NPT, ORB and BSP port connections.

A wide variety of end connections with the flexibility to perform in many dynamic applications. FS65 series distributes pressure evenly, eliminating axial loading of the sleeve. Able to rotate with very low torque – even up to their fully rotated pressure. FS5900 series is designed for 25in/Hg vacuum to 5000psi operating pressures, and provides full flow with minimal pressure drop.

The SYFLEX thermoplastic hose offers the best product for hydraulic, truck, sub-sea and specialty applications. SYNFLEX offers a variety of hoses that meet or exceed SAE specifications and are available in sizes that range from 1/8" ID through to 1" with pressures up to 10,000 psi manufacturers specifications.

A complete line of brass fittings for all pneumatic applications. Available with the following connections:

- 45° flare
- threaded sleeve
- compression
- garden hose
- NPT
- air brake
- hose barb
- LOK on
- inverted flare
- Poly Push-on
- reusable
- compression for Poly
