A QUICK GUIDE TO ORDERING THE SPRA-VAC FLEX SPRAY VACCINATOR

The following is a guide to help you when ordering the new Spra-Vac Line Flex. The Spra-Vac Flex has many options to choose from that best fit your hatchery setup. This guide includes a picture of the sprayer, brief description, and part number. **All sprayer models are designed with modular components and can be retrofitted to other configurations with minimal effort if required.**

OPTION 1: One Vaccine

This option uses electricity and compressed air. It includes a hood, two nozzles, and two stainless steel tanks. The sprayer is setup for one chick conveyor and delivers one vaccine.

PART NUMBER: 185300, SPRA-VAC FLEX SINGLE WITH SS TANKS

OPTION 2: One Vaccine

This option requires electricity only. It includes a hood, two nozzles, and two clear plastic tanks. A diaphragm pump is used to transport the vaccine to the nozzles. This option does not require the use of compressed air. The sprayer is used for one chick conveyor and delivers one vaccine.

PART NUMBER: 185105, SPRA-VAC FLEX SINGLE WITH CLEAR TANKS

OPTION 3: Two Vaccines

This option uses electricity and compressed air. It includes one hood and two extra side panel holders, two spray rods, four nozzles, and four stainless steel tanks. The sprayer is used for one chick conveyor and delivers two separate vaccines.

PART NUMBER: 185200, SPRA-VAC FLEX DOUBLE WITH SS TANKS

OPTION 4: Two Vaccines

This option uses electricity only. It includes a one hood and two extra side panel holders, two spray rods, four nozzles, and four clear plastic tanks. Diaphragm pumps are used to transport the vaccines to the nozzles. This option does not require the use of compressed air. The sprayer is used for one chick conveyor and delivers two separate vaccines.

PART NUMBER: 185205, SPRA-VAC FLEX DOUBLE WITH CLEAR TANKS

OPTION 5: Up To Four Vaccines

This option is an add-on to the Spravac Line Flex double with SS Tanks or Clear Tanks. It includes a stand and two acrylic panels to form a hood. The other components needed are from the extra parts that are already available on the double sprayer. The Expansion Stand is used for a second chick line and delivers one separate vaccine.

PART NUMBER: 10202600, SPRA-VAC FLEX EXPANSION STAND

A **Standard Spravac Flex** Double with either SS or Clear Tanks with Spravac Flex Expansion Stand can deliver vaccinations on two separate automation lines with two independently controllable zones. If multiple vaccination is required for two separate chick conveyor lines, then you would need a **Special Order** Spravac Flex Double with either SS or Clear Tanks with four independently controllable zones.
